AMCAT Online test

AMCAT online test was held in college labs on 27 th Feb, 2020 for third year students. The test consisted of 7 modules out of which 5 modules (English, logical reasoning, personality, automata, quantitative aptitude) were compulsory and a choice was given for the rest two based on the field student has applied for. The test gave students the idea about the type of questions that are asked in recruitment test. It was like a reality check based on which the students can work in respective fields in which they are weak. AMCAT scores are used by many companies for recruitment process also.
