### **Report**

### **On**

### **Career opportunities in the areas of Sustainability, Renewable Energy, Urban Development and Water Resources**

IEEE PES MSIT in association with Department of Electrical and Electronics Engineering, Maharaja Surajmal Institute of Technology, New Delhi and TERI School of Advanced Studies, New Delhi, with an aim to aware the students about the career opportunities in the areas of Sustainability, Renewable Energy, Urban Development and Water Resources organized a session on 23th April, 2022. The session focused at the need of the hour to use sustainable and renewable sources as the fuel and conventional sources are depleting day by day at an alarming rate.

Being one of the pioneers of sustainability education in India, TERI SAS has emerged as one of the most prestigious and unique institution in the country that aspires to contribute globally by serving society as a center of advanced studies and to promote learning through teaching and creation of new knowledge. The speakers Ms. Sonika Goyal, Dr Prateek sharma, Dr. Shaleen, Dr. Sapan, Dr. Sherly enlighten the students about the Career Opportunities in niche areas such as environmental studies, business sustainability, biotechnology, renewable energy, water resources and climate change, which are significant areas of study in today's scenario. Not only have these areas emerged out of TERI's commitment to this field, but also out of the needs that exist in the society and market today.

The interactive webinar was a great success and it cleared the confusion about the future opportunities. It was attended by 100+ people, the students asked their questions to the speaker enthusiastically and got them all answered. The webinar proved to be a huge benefit for the students and was highly appreciated by everyone.
