

Interaction with a Senior

Date:- 2/11/2022

The session started with a brief introduction of Mr. Ritesh Rastogi who shared his experience with his juniors. After some talks with his seniors, he realized that DSA is everything to get a good job and here is started solving competitive programming problems on Codeforces and CodeChef. Very soon he achieved new heights in competitive programming as he has solved a good number of questions. This makes him more confident achieving the tag of Expert at Codeforces and 5-star coder at CodeChef. The group of friends, his team “bugabooSolvers” and “redSword” participated in International Collegiate Programming Contest (ICPC) two times. In this way, he is a two-time ICPC regionalist. In his 3rd year, he got a 6-month internship at ShareChat and received PPO (Pre-Placement Offer) as well. And now after graduation he has got a job at Direct-i (Zeta-suite) with a very good annual package.

Ritesh answered all the questions very clearly and he loved interacting with the juniors. He said seniors are always there to help juniors so feel free to contact him on his social media.
