7	Venue	Maharaja Surajmal Institute of Technology(Seminar Hall : 06)

On September 26, 2023, Silver Fern Education Consultants orchestrated an illuminating seminar at Maharaja Surajmal Institute of Technology in Janakpuri. The seminar featured two distinguished speakers - Kshitij Bhatia, an education strategist with more than seven years of experience, and Monika Ahuja, a dedicated education professional with a wealth of 15 years of experience. In collaboration with Silver Fern Education Consultants, the session started at 12:00 PM on 25th September 2023 as scheduled and went for an hour . The session aimed to provide students with invaluable insights into the prospects of pursuing higher education overseas. The audience comprised a diverse assembly of students and esteemed faculty members from the institute.

Moreover, Kshitij shared vital statistics regarding Indian students' success rates in securing visas for these countries. The UK boasts more than 130 universities with 175 thousand Indian

students holding visas. Canada, with over two lakh students securing visas, and Australia, although having tricky Genuine Temporary Entrant (GTE) clearance requirements, continue to be attractive destinations.

The seminar also delved into practical tips and techniques for a seamless application process. The discussion also encompassed the financial considerations involved in studying abroad, including scholarship opportunities and part-time work in the UK.
