

AVENSIS'24

Event Details

Date: January 31, 2024 and Ist Feb. 2024

Agenda:

The AVENSIS inauguration ceremony unfolded with the traditional lamp lighting, symbolizing knowledge and enlightenment, followed by a soulful Sarasvati Vandana. Prof. Rinky Dwivedi then outlined the fest's exciting events and highlighted its role in promoting innovation. The pivotal moment came when Shree Kaptan Singh officially declared AVENSIS open, setting the stage for a two-day tech extravaganza. The agenda was succinct yet impactful, ensuring an engaging and memorable start to the festival.

Description of Events to be held during Avenis- 2024

Fun and Creativity

- **Scavenger Hunt(Harry Potter Theme)**

Participants follow clues, solve puzzles, and navigate through hidden paths to uncover a coveted prize. This interactive quest combines mystery and exploration, challenging individuals or teams to use their wits and creativity in a thrilling pursuit of hidden treasure.

- **Memeverse**

"Memeverse" is a hilarious meme-making competition where participants unleash their creativity to craft the most clever and entertaining memes. With wit and humor as their tools, contestants navigate through rounds of laughter-inducing challenges, competing to create memes that capture the essence of the internet's ever-evolving humor landscape.

- **Creative Canvas**

"Creative Canvas" is a vibrant poster-making competition that invites artists to unleash their imagination on a blank canvas. Participants use a spectrum of colors, shapes, and ideas to craft visually stunning posters, showcasing their artistic flair and creativity. The competition serves as a colorful celebration of diverse talents and unique perspectives.

- **Gully Cricket**

"Gully cricket" is an informal and spirited form of cricket.

Technical

- **Hackathon Hackavensis**

A hackathon is an intense, collaborative event where programmers, developers, and creative minds come together to tackle real-world problems. Participants work against the clock to innovate and create solutions, showcasing their skills and producing functional prototypes or projects within a limited timeframe.

- **Algo Hunt**

An exhilarating coding competition designed to test the prowess of the sharpest minds in the world of programming! AlgoHunt is a two-round event that promises to challenge participants with a unique blend of problem-solving and debugging skills.

- **DSA Marathon**

Challenge Yourself: Tackle a series of coding problems designed to challenge your DSA skills. From beginner to advanced levels, there's something for everyone.

Code Against Time: Experience the adrenaline rush of time-bound coding sessions. Can you solve the problems before the clock runs out?

Prizes and Recognition: Compete with fellow coding enthusiasts for the top spots. Win exciting prizes and earn bragging rights as the DSA champion of Avenesis!

- **UI Utopia**

No Coding Required: This competition is all about design, with no coding involved. Showcase your UI/UX skills without the need for backend development.

Theme-Based Challenges: Participants will be given exciting themes to base their designs on. Let your imagination run wild and create captivating user interfaces.

Judging by Industry Experts: A panel of experienced judges from the field of design and user experience will evaluate and provide valuable feedback on your creations.

Prizes for Innovation: Stand a chance to win accolades and fantastic prizes for the most innovative and visually appealing designs.

- **Quiz**

It is an inter college event. A set of questions about tech and innovation will be asked from the teams. Team with the maximum number of correct answers will be the winner.

- **Human Ludo**
"Human ludo" involves replacing traditional game tokens with actual human participants in a life-sized version of the board game Ludo. Participants would act as the game pieces, moving around the board based on the rules of Ludo, creating a unique and entertaining experience with real-life interactions.
- **Mr and Ms Coder**
This will consist of three rounds. First round will be the Personality Round. Second round will be a code hunt similar to treasure hunt and the final round will be a coding round. Scores of all these rounds will be added to decide the winners.
- **Cupid AI**
"Cupid AI" is a modern twist on blind dates where artificial intelligence plays matchmaker, using algorithms to analyze preferences, interests, and compatibility factors to pair individuals for a potential romantic connection. Participants embark on a blind date, trusting the AI's matchmaking skills to introduce them to a compatible partner based on data-driven insights.

Gaming

- **Valorant**
Valorant is a popular tactical first-person shooter (FPS) game developed and published by Riot Games. Players engage in team-based matches, choosing characters with unique abilities to compete in objective-based gameplay. The game combines precise gunplay with strategic use of agents' abilities, creating a dynamic and competitive gaming experience.
- **Stumble guys**
In the game, players control customizable characters that navigate through obstacle courses filled with challenges and pitfalls. The goal is to be the last one standing by avoiding obstacles, outrunning opponents, and overcoming various hurdles. It's designed for lighthearted and entertaining gameplay, often drawing comparisons to other popular battle royale party games.
- **COD**
Call of Duty games often include both single-player campaigns and multiplayer modes. The multiplayer aspect allows players to compete against each other in various game modes, while the single-player campaigns often feature cinematic and immersive storytelling.
- **BGMI**
Multiplayer Game

Robotics

- **Robo War**

Robowar is where robots battle it out, proving their strength and strategy in a robotic showdown. It's like a high-tech robot gladiator arena.

- **Robo Maze**

Robomaze challenges robots to navigate tricky paths on their own, testing their agility and problem-solving. It's like a robot puzzle adventure.

- **Robo Soccer**

Robosoccer is like soccer but with robot teams, working together to score goals and showcasing cool teamwork and precision skills.

Cultural

- **Pehchan**

Dance groups from different colleges dazzle on stage, moving to the beat with style and skill, as they compete to win hearts and applause in a lively dance showdown.

- **DJ**

- **Star Night**

A star night with a singer is like a musical spectacle, where the artist shines on stage, filling the air with enchanting melodies. The audience is wrapped in the magic of the performer's voice, creating a memorable and captivating night.
