

EXPERT TALK ON

OVERVIEW OF AIR POLLUTION AND HEALTH EFFECTS

Viksit Bharat organized an expert talk along with UBA MSIT and NSS MSIT to create awareness regarding air pollution and its adverse effects. The faculty also joined along with the students for this great initiative. This event took place in the MSIT seminar hall on Friday, 26 April 2024.

The event began with inviting Dr. Palak Balyan to share her knowledge about the topic. She started with making the audience understand the gas structure and how changes in the air is adversely affecting our health.

She shed some light on ways to measure air pollution from both around a person and in society at large which includes satellite air pollution monitoring also. The reasons or the causes of air pollution were highlighted which maybe due to improper use of land or other resources. All these adversely affect one's health, average living years of humans which may start with headache and body pain to respiratory disease.

She with her impactful words bursted the myths and introduced the audience to the various programs being run by the government to control air pollution. The faculty also was keen to know deep about the topic and heard the speaker.

At the end of her speech a plant was presented by the Director of MSIT as a token of love and the event was dispersed at 11.00AM.
