

Report on Visit to AICTE Headquarters for Seminar on Electric Consumption Reduction

Date: 22th April,2024

Venue: AICTE Headquarters, New Delhi

Organized By: AICTE & Computer Science & Engineering Department

Purpose: Seminar on Reduction of Electric Consumption

Introduction:

On 22/04/2024, few students from Maharaja Surajmal Institute of Technology (MSIT), New Delhi attended a seminar at the All India Council for Technical Education (AICTE) Headquarters in New Delhi. The seminar aimed to address the pressing issue of reducing electric consumption by 20% in educational institutions. The event brought together various educational institutions to contribute, participate, and listen to insightful discussions and strategies.

Attendees:

Representatives from multiple educational institutions across the country participated in the seminar. These included students who were keen on addressing the challenge of reducing electric consumption in their respective institutions. The list of following students participate in this seminar are:

Prince Sharma, Vikash Kumar, Pradeep Singh , Varun , Ayush Dev, Meghansh Kandpal, Vaibhav Arora, Harshit Kumar Singh of CSE (2022-2026 Batch).

Seminar Highlights:

The seminar commenced with an opening address by officials from AICTE, emphasizing the importance of sustainability and energy efficiency in educational institutions. Following this, keynote speakers from renowned institutions shared successful case studies and innovative strategies for reducing electric consumption.

Case Studies:

Representatives from institutions that had successfully implemented energy-saving initiatives shared their experiences and best practices. These case studies provided valuable insights into the practical implementation of energy-efficient technologies and behavioral changes.

Panel Discussions:

Engaging panel discussions were held on topics such as the role of technology in energy conservation, student involvement in sustainability initiatives, and policy frameworks for promoting energy efficiency

in educational institutions. Participants actively exchanged ideas, challenges, and solutions during these discussion

Conclusion:

The seminar at AICTE Headquarters provided a platform for educational institutions to collaborate, learn, and strategize towards achieving the goal of reducing electric consumption by 20%. Through insightful discussions, interactive sessions, and networking opportunities, attendees gained valuable knowledge and resources to implement sustainable practices in their respective institutions. Maharaja Surajmal Institute of Technology looks forward to implementing the lessons learned from the seminar and continuing its journey towards energy efficiency and sustainability.
