

## **Webinar on “How to prepare for ZS Campus drive”**

### **Batch 2025 students**

On July 11, 2024, at 12:00 PM, MSIT Placement committee hosted an online webinar convened by Dr. Meena Rao, featuring four speakers: Sunaina Rustagi, Dhruv, Yash Bhardwaj, and Abhinav Mahakul. These accomplished individuals shared their personal experiences and strategies for getting selected by ZS Company, providing valuable insights into the selection process.

They discussed the crucial aspects of preparation, including aptitude tests, data structures and algorithms (DSA), vocabulary building, and interview readiness. The speakers emphasized the importance of strong mathematical and logical reasoning skills for aptitude tests, suggesting regular practice through online mock tests and specific preparation books. They highlighted the need to master both basic and advanced DSA concepts, recommending platforms like LeetCode and HackerRank for consistent practice. For vocabulary and communication skills, they stressed the significance of a robust vocabulary, advising students to engage with word lists and read extensively.

The discussion on interview rounds covered both technical and HR aspects. For technical interviews, the focus was on demonstrating problem-solving skills and coding proficiency, while for HR interviews, clear communication, confidence, and thorough company research were deemed essential. The speakers also addressed common mistakes, such as underestimating the importance of practice, neglecting DSA fundamentals, inadequate preparation for HR interviews, and inconsistent study routines. To aid in preparation, the speakers provided source materials, including recommended books, online resources, sample interview questions, and mock test links. They also offered tips for improving vocabulary and communication skills.

The session was highly interactive, with students actively participating and asking questions. The speakers generously shared their contact details to assist students with any further queries.

Overall, the approximately 2-hour session was immensely beneficial for students aiming to secure a position at ZS Company, equipping them with practical tips and strategies to enhance their preparation and avoid common pitfalls.
